PREFATORY NOTE

This List is principally concerned with expository works on the banking and currency systems of the world and with plans and discussions of currency reform in this country.

Works on the theory and the history of banking and currency are also noted as supplying information and guidance in dealing with the existing currency.

The banking systems of Great Britain, France, Germany, and Canada have received special attention, as they possess features, such as central banks of issue, asset currency, etc., which have been recommended for adoption in this country.

Collective histories of the principal banking systems of the world are included, such as Conant's *History of Modern Banks of Issue*, and *History of Banks in All the Leading Nations*, New York, 1896, which latter consists of independent histories by various writers, including: *Banking in Great Britain*, by Henry D. MacLeod; *Banking in France*, Italy, Spain, Belgium, Switzerland, Portugal, and Roumania, by Pierre Des Essars; *Banking in Canada*, by Byron E. Walker; *Banking in Germany and Austria-Hungary*, by Max Wirth, etc. Brief expositions are contained in Dunbar's *Chapters on the Theory and History of Banking*, Handy's *Banking Systems in the World*, and the Report of the New York Chamber of Commerce, October, 1906. This report recommends a central bank of issue and describes the operation of central banks of Europe, and has an appendix containing letters from the officials of the banks of France, Germany, Austria-Hungary, and the Netherlands, giving brief expositions of the systems in practice.

Current statistics of foreign banks.—Tabular statistics of the Bank of France and of the Imperial Bank of Germany are given in the Statistical abstract for the principal and other countries. Tabular statistics of the Bank of England are given in the Statistical abstract for the United Kingdom in each of the last fifteen years. Both of these volumes are issued by the British Board of Trade.

Annual reports of the Bank of France, Bank of Germany, and central banking institutions of other countries are printed in the *Bankers', Insurance Managers', and Agents' Magazine*, London.

Weekly circulation returns, including returns of the Bank of England, Bank of France, Imperial Bank of Germany, and British private and joint stock banks, are printed in *Journal of the Institute of Bankers*, London.

The cited discussion of the most recent phases of the currency question is in the main confined to articles in periodicals, which are arranged chronologically.

The list is provided with a topical index for guidance to special subjects.

The work named below was received while the list was in press:

The Currency problem and the present financial situation: a series of addresses delivered at Columbia University, 1907-1908.

New York: The Columbia university press, 1908. xxvii, 170 pp. \$.

CONTENTS.—Introduction: The crisis of 1907 in the light of history, by Edwin R. A. Seligman, pp. ix-xxvii; The modern bank, by Frank A. Vanderlip, pp. 3-18; The stock-exchange and the money market, by Thomas F. Woodlock, pp. 21-40; Government currency *vs.* bank currency, by A. Barton Hepburn, pp. 43-59; Gold movements and the foreign exchanges, by Albert Strauss, pp. 63-87; The New York clearing house, by William A. Nash, pp. 91-94; Clearing houses and the currency, by James G. Cannon, pp. 97-117; American and European banking methods and bank legislation compared, by Paul M. Warburg, pp. 121-151; The modern corporation, by George W. Perkins, pp. 155-170.

— — *Same.*

(In Hull, Walter Henry, *ed.* Practical problems in banking and currency, pp. 405-413. New York, 1907. 8°.)

—— The Wall street point of view.

New York, Boston, [etc.]: Silver, Burdett and company, [1900]. xiv, (2), 290 pp. Frontispiece (port.) 12°.

Conant, Charles Arthur. Banking upon business assets.
New York, 1897. 16 pp. (Sound currency, vol. 4, no. 23, Dec. 1, 1897.)

——— A history of modern banks of issue; with an account of the economic crises of the present century. Fourth impression.

New York: G. P. Putnam's sons, 1902. xv, 595 pp. 8°.

The preface is dated Nov. 12, 1896, and states, "The changes made in the present edition of this book are unimportant, because of the short time which has elapsed since the appearance of the first edition. There have been few changes in the banking laws of important states within the last six months, and even statistics are not yet available for a later year than 1895."

Contents include chapters on the banking systems of different countries which have view in part to the plan of operation of central banks in Europe, the organizations of which, especially in France, Germany, Austria-Hungary, and the Netherlands, have been suggested as basis for currency revision in this country. There is also a chapter on the Canadian banking system.

(In Sound currency, vol. 8, Dec. 1901, pp. 209-232.)

"Nowhere, probably, in the whole range of the banking history of the United States can be found a more fruitful subject of study than the currency issued by the State banks of New England in the last two decades before the Civil War.

It is admitted by all that this currency was elastic and adaptable to commercial needs—consequences which followed from the fact that it was based upon the general commercial assets of the issuing banks.

"The relative success attending the New England currency system is particularly instructive because of the similarity between the conditions under which it operated and those which obtain to-day throughout the greater part of the territory covered by the National banking system."

VI. Zusammenfassung. Literaturverzeichnis.

"In den kleinsten Orten der Vereinigten Staaten finden wir Bankinstitute, zum grossen Teil sogar Notenbanken. Durch die weitgehendste Dezentralisation, die durch das Verbot der Errichtung von Filialen künstlich aufrecht erhalten wird, ist es erreicht, dass fast jedermann Bankdarlehn zu mässigen Zinssätzen erhält, der nur irgend einen Beweis dafür hat, dass er im Stande ist, das Darlehn zurückzuzahlen. Es gibt kaum ein produktives Unternehmen, das des Beistandes der Banken entbehren muss. Das ganze System besitzt das Vertrauen und die Zufriedenheit des Publikums.

"Trotzdem haften ihm eine Reihe von bedeutenden Mängeln an, wie wir gezeigt haben, die zum grössten Teil auf dem Fehlen einer Zentralnotenbank beruhen. 1. Das dezentralisierte System der Vereinigten Staaten ist m. E. nicht mehr Zeitgemäss.

"Demnach kann man wohl sagen, dass es für die Vereinigten Staaten an der Zeit wäre, dem Vorbild der europäischen Staaten zu folgen, das Verbot der Errichtung von Filialen für die Banken fallen zu lassen und durch die Neugründung einer Bundesbank die zahlreichen Mängel des Geld- und Bankwesens zu beseitigen."

1906. Recommendations of the Currency commission of the American bankers' association.
Bankers' magazine (New York), vol. 73 (Dec., 1906) : 865-868.

National banks to issue credit notes carrying against them the same reserves now carried against deposits, and paying taxes on them in gold to the Treasurer of the United States to constitute a guaranty fund, while facilities shall be provided for active daily redemption. Also recommending that the existing law limiting the retirement of bond-secured notes to \$3,000,000 be repealed, and that all public moneys, above a reasonable working balance, be currently deposited in national banks which shall pay into the United States Treasury interest thereon at the rate of two per cent. per annum.

1906. The plans for currency reform. Charles A. Conant.
Bankers' magazine (New York), vol. 73 (Dec., 1906): 897-904.
 Traces the genesis of the present currency reform movement, describes the personnel of the currency commission of the American Bankers' Association, and discusses fundamental principles considered by the commission in its endeavor to meet existing conditions.
1906. Currency reform. Recommendations contained in the annual report of Hon. Wm. B. Ridgely, Comptroller of the currency.
